Description
A fascinating study into the multiple, complex and changing negotiating processes and bargaining structures constitutive of the intellectual exile of the 1930s.

‘No one among our contemporaries has thought more deeply about exile than David Kettler. His new book illuminates its historical modes, its cultural impact and its personal cost. Humane without being mawkish, analytical without being cold, ‘The Liquidation of Exile’ instructs and inspires the reader in equal measure. Those of us fortunate enough to have lived peaceful lives in quieter times can only gasp in amazement at what these refugee intellectuals endured – and achieved.’ — Professor Peter Baehr, Lingnan University

‘David Kettler has written a fascinating and thoughtfully accessible account of one of the most devastating and intriguing periods of modern intellectual history.’ — Professor Gerhard Lauer, University of Göttingen

Through a series of focused studies, this volume seeks to explore and define the condition of intellectual exile in relation to the event that has generated the richest literature in exile studies: the emigration of intellectuals from Nazi Germany. By examining his own experiences along with those of other intellectual émigrés, David Kettler argues that intellectual exile is a difficult, dependent and fluid condition, whose achievements are dearly bought, and whose endings rarely fulfill the missions informing their beginnings. Building on many years of inquiry into the sociology of intellectuals, The Liquidation of Exile proposes how we should define the study of intellectual exile, and reflects upon the nature and outcome of the condition, the affinities it creates, and the conflict that arises between the experience of exclusion and the prospect of return.

Readership: Scholars and students in the fields of sociology, political theory, cultural politics, and intellectual history. Its lively narrative cases and absence of technical terminology in the theoretical framework also make it suitable for the interested general reader.
